"This is not a book about charismatic visionary leaders. It is not about visionary product concepts or visionary products or visionary market insights. Nor is it about just having a corporate vision. This is a book about something far more important, enduring, and substantial. This is a book about visionary companies." So write Jim Collins and Jerry Porras in this groundbreaking book that shatters myths, provides new insights, and gives practical guidance to those who would like to build landmark companies that stand the test of time. Drawing upon a six-year research project at the Stanford University Graduate School of Business, Collins and Porras took eighteen truly exceptional and long-lasting companies -- they have an average age of nearly one hundred years and have outperformed the general stock market by a factor of fifteen since 1926 -- and studied each company in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from other companies?" What separates General Electric, 3M, Merck, Wal-Mart, Hewlett-Packard, Walt Disney, and Philip Morris from their rivals? How, for example, did Procter & Gamble, which began life substantially behind rival Colgate, eventually prevail as the premier institution in its industry? How was Motorola able to move from a humble battery repair business into integrated circuits and cellular communications, while Zenith never became dominant in anything other than TVs? How did Boeing unseat McDonnell Douglas as the world's best commercial aircraft company -- what did Boeing have that McDonnell Douglas lacked? By answering such questions, Collins and Porras go beyond the incessant barrage of management buzzwords and fads of the day to discover timeless qualities that have consistently distinguished out-standing companies. They also provide inspiration to all executives and entrepreneurs by destroying the false but widely accepted idea that only charismatic visionary leaders can build visionary companies. Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the twenty-first century and beyond.

"Messrs. Gow and Kells have made an invaluable contribution, writing in an amused tone that nevertheless acknowledges the firms' immense power and the seriousness of their neglect of traditional responsibilities. 'The Big Four' will appeal to all those interested in the future of the profession--and of capitalism itself." —Jane Gleeson-White, Wall Street Journal With staffs that are collectively larger than the Russian army and combined revenues of over \$130 billion a year, the Big Four accounting firms—Deloitte, PricewaterhouseCoopers, Ernst & Young, and KPMG—are a keystone of global commerce. But leading scholar Ian Gow and award-winning author Stuart Kells warn that a house of cards may be about to fall. Stretching back to the Medicis in Renaissance Florence, this book is a fascinating story of wealth, power, and luck. The founders of the Big Four lived surprisingly colorful lives. Samuel Price, for example, married his own niece. Between the world wars, Nicholas Waterhouse collected postage stamps while also hosting decadent parties in his fashionable London home. All four firms have endured major calamities in recent decades. There have been hundreds of court cases and legal prosecutions for failed audits, tax scandals, and breaches of independence. The firms have come so close to “extinction level events” that regulators have required them to prepare “living wills.” And today, the Big Four face an uncertain future—thanks to their push into China, their vulnerability to digital disruption and competition, and the hazards of providing traditional services in a new era of transparency. This account of the past, present, and likely future of the Big Four is essential reading for anyone perplexed or fascinated by professional services, working or considering working in the industry, or simply curious about the fate of the global economy.

Author of cult classics The Pumpkin Plan and The Toilet Paper Entrepreneur offers a simple, counterintuitive cash management solution that will help small businesses break out of the doom spiral and achieve instant profitability. Conventional accounting uses the logical (albeit, flawed) formula: Sales - Expenses = Profit. The problem is, businesses are run by humans, and humans aren't always logical. Serial entrepreneur Mike Michalowicz has developed a behavioral approach to accounting to flip the formula: Sales - Profit = Expenses. Just as the most effective weight loss strategy is to limit portions by using smaller plates, Michalowicz shows that by taking profit first and apportioning only what remains for expenses, entrepreneurs will transform their businesses from cash-eating monsters to profitable cash cows. Using Michalowicz's Profit First system, readers will learn that:

- Following 4 simple principles can simplify accounting and make it easier to manage a profitable business by looking at bank account balances.
- A small, profitable business can be worth much more than a large business surviving on its top line.
- Businesses that attain early and sustained profitability have a better shot at achieving long-term growth.

With dozens of case studies, practical, step-by-step advice, and his signature sense of humor, Michalowicz has the game-changing roadmap for any entrepreneur to make money they always dreamed of.

Not everyone is cut out to be a professional accountant, but those who want to move up the corporate ladder know that they need to master the essentials of accounting. This updated edition also includes the latest information on International Financial Reporting Standards, capital budgeting, and break even, plus new advice on how to find financial facts and read company accounts.
