'It is not our struggle to be happy that is mistaken; it is our false idea that we can find happiness anywhere but in ourselves... happiness does not depend on outward things. It is born of the mind, it is nourished by the mind, it is what rises, like breath in a frosty air, from the mind's wrestling with its fate...' The Art of Happiness (first published in 1935) belongs to John Cowper Powys's sequence of philosophical writings, and finds him exploring the problem of how man lives with his fellow man, and also with woman - that is to say, here, as opposed to the

abstract arguments concerning Man in the universe, Powys is concerned with the practical arguments such as arise between man and his neighbour, his wife, his lover - and also with man's arguments against himself, all in the pursuit of happiness. The careful reader will find herein hints, clues, intimations, as to how we all might become a little happier - an invitation few of us would feel so fortunate as to refuse.

Explores the end-of-life spiritual needs of people who do not identify with traditional religions. This groundbreaking book addresses the spiritual aspect of hospice care for those who do not fit easily within traditional religious beliefs and categories. A companion volume to Religious Understandings of a Good Death in Hospice Palliative Care, this work also advocates for renewed attention to the spiritual, the often overlooked element of hospice care. Drawing on data from clinical case studies, new sociological research, and the perspectives of agnostics, atheists, those who emphasize the spiritual rather than institutional dimensions of a traditional religion, and the rapidly growing cohort of those who

describe themselves as spiritual-but-not-religious, the contributors to this volume interpret the shift from predominantly Christian-based pastoral services to a new approach to the spiritual shaped by the increasing diversity of Western societies and new understandings of the nature of secular society. How do we use it in a way that enables caregivers to assist patients? Clinicians and policy makers will appreciate the books practical recommendations regarding staff roles, training, and resource allocation. General readers will be moved by the persuasive call for greater religious and spiritual literacy at every level of health care in order to respond to the full spectrum of human needs in life and in death. In Asia, amidst its varied levels of economic development and diverse cultural traditions and political regimes, the Internet and mobile communications are increasingly used in every aspect of life. Yet the analytical frames used to understand the impact of digital media on Asia predominantly originate from the Global North, neither rooted in Asia's rich philosophical traditions, nor reflective of the sociocultural practices of this dynamic region. This volume examines digital phenomena and its impact on Asia by drawing on specifically Asian perspectives. Contributors apply a variety of Asian theoretical frameworks including guanxi, face, qing, dharma and karma. With chapters focusing on emerging digital trends in China, Hong Kong, India, Japan, Korea, Philippines, Singapore, and Taiwan,

the book presents compelling and diverse research on identity and selfhood, spirituality, social networking, corporate image, and national identity as shaped by and articulated through digital communication platforms.

This book is a brief, 2-color, paperback version of Dessler's Management: Leading People and Organizations in the 21st Century 2/e. It covers all key topics in management, in a traditional Planning, Organizing, Leading, and Controlling framework. Chapter topics include managing in the 21st century, managing in a global environment, making decisions, planning and setting objectives, strategic management, the fundamentals of organizing, designing organizations to manage change, staffing the organization, being a leader, motivating employees today, communicating in today's organizations, managing groups and teams, managing organizational and cultural change, and controlling and building commitment. For all levels of managers in a variety of fields and industries.

The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual

illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two-semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.
