Mondiale waardeketens zijn het complexe netwerk van activiteiten tussen lokale producent en eindgebruiker. "Global value chains" schetst de invloed van deze waardeketens op lokaal, nationaal en internationaal niveau. Het boek geeft eerst een theoretisch en wetenschappelijk kader. Vervolgens krijgt de lezer een compleet beeld van de betekenis van mondiale waardeketens aan de hand van diverse casestudies, zoals de bierbrouwindustrie in Ghana, de Namibische bio-industrie, de industrie van halfgeleiders in China en Maleisië en het toerisme in Tanzania.

This book explores the place of poor people within a rich variety of value chains, focusing upon lagging, rural regions in Africa and Asia, and how they can 'upgrade' within such chains. Upgrading is a key concept for value chain analysis and refers to the acquisition of technological capabilities and market linkages that enable firms to improve their competitiveness and move into higher-value activities. The authors examine a range of evidence to assess whether the 'bottom billion' people, living mainly in the rural areas of low-income countries, can improve their position through productive strategies and, if so, how? They propose an innovative conceptual framework of value chain upgrading for some of the most marginal producers in the poorest local economies. They demonstrate how interventions can improve poverty and the environment for poor people supplying a wide range of services and agricultural and food products to local, regional and global markets. This analysis is based on empirical research conducted in Senegal, Mali, Tanzania, India, Nepal, Philippines and Vietnam. The main focus is on poverty, environment and gender outcomes of upgrading interventions, and represents one of the key challenges of contemporary development economics.

The Balanced Scorecard translates a company's vision and strategy into a coherent set of performance measures. The four perspectives of the scorecard--financial measures, customer knowledge, internal business processes, and learning and growth--offer a balance between short-term and long-term objectives, between outcomes desired and performance drivers of those outcomes, and between hard objective measures and softer, more subjective measures. In the first part, Kaplan and Norton provide the theoretical foundations for the Balanced Scorecard; in the second part, they describe the steps organizations must take to build their own Scorecards; and, finally, they discuss how the Balanced Scorecard can be used as a driver of change.

The most successful business book of the last decade, Reengineering the Corporation is the pioneering work on the most important topic in business today: achieving dramatic performance improvements. This book leads readers through the radical redesign of a company's processes, organization, and culture to achieve a quantum leap in performance. Michael Hammer and James Champy have updated and revised their milestone work for the New Economy they helped to create -- promising to help corporations save hundreds of millions of dollars more, raise their customer satisfaction still higher, and grow ever more nimble in the years to come.

For the first time, a collection of monologues to work on in Dialect! Challenging monologues which require dialect have been compiled in this new work from Smith & Kraus. In sections with an introduction and description of each dialect, there are scenes which use Standard British, Cockney British, Irish, Russian, American Southern and Brooklyn dialects (to name a few)! This book is excellent as a supplement to your acting/speech training and would be great use in scene study classes and Dialect courses.

The "Greatest Business Book of All Time" (Bloomsbury UK), In Search of Excellence has long been a must-have for the boardroom, business school, and bedside table. Based on a study of forty-three of America's best-run companies from a diverse array of business sectors, In Search of Excellence describes eight basic principles of management -- action-stimulating, people-oriented, profit-maximizing practices -- that made these organizations successful. Joining the HarperBusiness Essentials series, this phenomenal bestseller features a new Authors' Note, and reintroduces these vital principles in an accessible and practical way for today's management reader.

"Providing psychotherapy services to the underserved is a significant problem with far reaching consequences. This book brings together discussions of multiple groups of underserved, some of whom are generally neglected by much of the literature. This book is designed to help mental health professionals who provide psychotherapy increase their awareness of the key issues related to many different peoples. Zimmerman, Barnett and Campbell bring together contributors who focus on many underserved communities, in their many different forms, both within and outside the United States. This wide-ranging discussion of the issues of many underserved peoples has chapters written by experts in their respective fields, offering their thoughts and very practical advice. The first four sections of the book focus on systemic factors, discrimination, people in transition and people who are often overlooked or are "invisible". Each of these chapters follows the same format to bring you a more consistent reading experience. The authors begin by discussing the scope and offer a description of the problem area they are addressing. They then discuss barriers to service delivery, how to create or improve cultural competence, and effective strategies and empirically-supported treatments for best meeting the treatment needs of this population. They conclude by discussing future steps. The fifth section addresses other challenges related to ethics and research. Overall, whether you read this book cover-to-cover, or pick individual chapters that are of particular relevance or interest, Bringing Psychotherapy to the Underserved is a valuable resource for you as you strive to approach underserved communities in socially responsible, culturally sensitive, ethical, and effective ways"--

Sensory analysis is not new to the food industry, but its application as a basic tool in food product development and quality control has not been given the recognition and acceptance it deserves. This, we believe, is largely due to the lack of understanding about what sensory analysis can offer in product research, development and marketing, and a fear that the discipline is 'too scientific' to be practical. To some extent, sensory scientists have perpetuated this fear with a failure

to recognize the constraints of industry in implementing sensory testing procedures. These guidelines are an attempt to redress the balance. Of course, product 'tasting' is carried out in every food company: it may be the morning tasting session by the managing director, competitor comparisons by the marketeers, tasting by a product 'expert' giving a quality opinion, comparison of new recipes from the product development kitchen, or on-line checking during production. Most relevant, though, is that the people responsible for the tasting session should know why the work is being done, and fully realize that if it is not done well, then the results and conclusions drawn, and their implications, are likely to be misleading. If, through the production of these guidelines, we have influenced some people sufficiently for them to re-evaluate what they are doing, and why, we believe our efforts have been worthwhile.

Commodity chains link the processes of manufacturing that result in a final product available for individual consumption. This book explores the global commodity chains approach, which reformulates the basic conceptual categories for analysing patterns of global organisation and change.

French Lover is the story of Nilanjana, a young Bengali woman from Kolkata who moves to Paris after getting married to Kishanlal, a restaurant owner. Kishanlal's luxurious apartment seems to be a gilded cage for Nilanjana, and she feels stifled within its friendless confines. Her marriage, where she functions as little more than a housekeeper and sex object, is far from fulfilling and Nilanjana desperately looks for a way out of the boredom and depression that threaten to engulf her. It is at this point that she meets Benoir Dupont, a blond, blue-eyed handsome Frenchman, and is swept off her feet. Benoir introduces Nilanjana to the streets, cafes and art galleries of Paris. In her passionate, sexually liberating relationship with Benoir, she finally begins to have an inkling of her own desires. The relationship ends when Nilanjana realises that Benoir's first priority is himself and not the woman he loves, and that her need for him has ended. But her road to self-discovery has only just begun. Bold in concept and powerful in execution, French Lover is a fascinating glimpse into the workings of a woman's mind as she struggles to come to terms with her identity in a hostile world.

This book invites readers to reconsider how writing studies researchers work with Institutional Review Boards (IRBs) on behalf of their communities and argues that engaging with IRBs during the research design process helps practitioners conduct research more quickly and effectively. Using empirical data from both writing studies and extra-disciplinary contexts, Dr. Johanna Phelps presents findings from two discipline-wide studies, as well as metadata from two IRBs, to develop a principled engagement framework for writing studies researchers to interact with their communities. Phelps further examines the many facets of conducting research with human participants—from comprehending federal policy updates to pondering specific ethical issues to developing detailed research designs—and explores the confluence of ethics, policy, and methodology in a thoroughgoing philosophical investigation of writing studies as a public good. This engaging and timely exploration of research design will be an important resource for scholars and students of writing studies; rhetoric and composition; technical and professional communication; cultural rhetoric; literacy studies; research design; research methodologies; research ethics; IRBs; justice; and critical theory. Las claves para enfrentarse a un mundo en constante cambio y con alta capacidad de innovación, residen en adquirir estrategias, modelos y conocimientos críticos que permitan el desarrollo de competencias que conduzcan al éxito a las organizaciones y las personas que la forman. Se habla entonces, de ambientes personales y laborales, cambiantes y exigentes donde se hace cada vez más evidente la necesidad de desarrollar personas con conocimientos, habilidades y actitudes acordes a la demanda del mercado, requiriendo que tengan, desarrollen o en el mejor de los casos potencien unos perfiles competitivos, flexibles y emocionalmente estables, haciendo organizaciones igualmente competitivas y socialmente responsables. El reto que plantea Habilidades gerenciales, es el permitir al lector sobresalir, a pesar de las circunstancias y asumir responsabilidades con alto grado de madurez, donde el cambio y la adaptación son la única garantía de éxito

personal y profesional.

It is crucial that engineers – from students to those already practising – have a deep understanding of the environmental threats facing the world, if they are to become part of the solution and not the problem. Is there a way to reconcile modern lifestyles with the compelling need for change? Could new improved technologies play a key role? If great leaps in the environmental efficiency of technologies are needed, can they be produced? Engineers are in a privileged and hugely influential position to innovate, design and build a sustainable future. But are they engaged or uninterested? Are they knowledgeable or ignorant? This book has been developed by a number of committed educators in European engineering departments under the leadership of Delft University of Technology and the Technical University of Catalunya to meet the perceived gap between what engineers know and what they should know in relation to sustainable development. The University of Delft decided as long ago as 1998 that all of its engineering graduates, working towards careers as designers, managers or researchers, should be prepared for the challenge of sustainable development and, as such, should leave university able to make sustainable development operational in their designs and daily practices. The huge amount of knowledge gathered on best-practice teaching for engineers is reflected in this book. The aim is to give engineering students a grounding in the challenge that sustainable development poses to the engineering profession, the contribution the engineer can make to attaining some of the societal and environmental goals of sustainability, and the barriers and pitfalls engineers will likely need to confront in their professional lives. Concise but comprehensive, the book examines the key tools, skills and techniques that can be used in engineering design and management to ensure that whole-life costs and impacts of engineering schemes are addressed at every stage of planning, implementation and disposal. The book also aims to demonstrate through real-life examples the tangible benefits that have already been achieved in many engineering projects, and to highlight how real improvements can be, and are being, made. Each chapter ends with a series of questions and exercises for the student to undertake. Sustainable Development for Engineers will be essential reading for all engineers and scientists concerned with sustainable development. In particular, it provides key reading and learning materials for undergraduate and postgraduate students reading environmental, chemical, civil or mechanical engineering, manufacturing and design, environmental science, green chemistry and environmental management.

Modern" integrated value chains need not necessarily exclude the smallest producers as this book aims to explain in detail by case studies. The issue is particularly topical in India, where modern retailing has come to the scene only recently and the majority of whose population are still small farmers and artisans. Following a brief introduction to the problem, 14 case studies from India are presented to illustrate how it is being solved in practice. The book also discusses the impact of organized retailing on small-scale traders, and finally analyses the case studies for an overview, with conclusions and learnings drawn from them. Inclusive Value Chains shows by practical examples that it is possible to link the smallest producers of fresh produce, commodities and handicrafts profitably, to modern integrated markets, within the country of origin as well as abroad.

We have entered into an entirely new era, an age of increasingly frequent and intense periods of turbulence in the global economy. Unlike past recessions, today's crises have precipitated a need for businesses to develop a new mindset, one that takes into account intermittent periods of disturbance, allowing them to thrive while under the constant threat of chaos. Chaotics presents a revolutionary set of guidelines designed to help businesses: • detect sources of turbulence • prepare scenarios • predict resulting vulnerabilities and opportunities • develop responses to ensure long-term resilience and success • avoid risk while advancing the interests of the company • build flexibility into the balance sheet • price strategically • adjust products to meet new customer values • and more. Complete with metrics and measurements, Chaotics outlines a powerful new system for managing waves of uncertainty affecting customers, employees, and other stakeholders. In this climate of increased turbulence, no organization can survive with less.

The book looks to address the following questions in a post-crisis world: How have lead firms responded to the crisis? Have they changed their traditional supply chain strategy and relocated and/or outsourced part of their production? How will those changes affect developing countries? What should be the policy responses to these changes?

Over the past decade, interest in language teacher education and professionalization programs has increased significantly mainly due to global educational reforms, which have been driven by internationalization, multilingualism, the rise of new literacy and the incorporation of technologies. These reforms, based on the challenges of knowledge societies and networks, have created the need to re-evaluate and reconceptualize teacher training and teacher professional development as a "fundamental connection to teaching" (Bryant et al., 2008; Vélaz de Medrano & Vaillant, 2009; Espinosa, 2012; Johnson and Golombeck, 2018). The main objective is, then, to "prepare the new generations within an increasingly uncertain and demanding global scenario" (Pérez Ruíz, 2014, p 114). This publication addresses work on the education of language teachers in a variety of sociocultural, educational and institutional contexts carried out in Mexico and Latin America with various methodological designs and approaches from different theoretical perspectives. Therefore, in the context of current challenges, we seek to promote the exchange, discussions of experience and results of research and reflection that can influence the direction and implementation of language policies regarding teacher education and teacher professionalization for language teaching.
