Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be

understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

This book studies learning as a social enterprise, contextually situated, organized and assessed. It gives a broad theoretic grounding for an understanding of learning which goes beyond a common reductionist approach. The book discusses four related approaches to learning which share a social perspective: social semiotics and multimodality; a design-theoretic approach to learning; a socio-cultural perspective; and a perspective of mimetic learning. Contributing authors consider the theoretical question of how to understand educational systems, learning and social communication as historically situated practices. The chapters in this book analyze key working practices including: analyzing what learning, remembering and cognitive work is like in a practice involving different kinds of expertise; problem-solving and engaging through collaboration; learning and teaching in different formal, semi- and non-formal environments; a design-theoretic approach to learning; social semiotic perspectives on learning; the mimetic and ritual dimension of learning; how social learning can be organized to support students; how learning has been conceptualized in psychology and neighbouring research areas. This book will be of great interest to students and researchers interested in learning and meaning-making, multimodal representations and communication, designs for learning, education and teaching, and social achievement in different formal and non-formal contexts.

Educational leaders confront instances of inequity every day, whether they are aware of it or not. Many find themselves inadequately reacting to such issues due in part to traditional preparation programs that fail to interrogate the existence and impact of systems of oppression. Why is naming and tackling inequity not at the forefront of every conversation about educational leadership? How do our social constructions of identity hierarchies and deficits (mis)shape what leaders think and do? How do leaders advocate for those who need and deserve advocacy? This volume considers these questions and more by offering unique leadership frameworks that integrate critical theories for social change with everyday practice. By bringing together diverse researchers, practitioners, and policymakers who are often pushed to the margins, this volume will help today's leaders see with new eyes and gain the critical tools, language, and concepts for equity leadership.
