This book charts contemporary illustration's rich history: from the rampant idealism of the 1960s to the bleak realism of the 1970s, and from the over-blown consumerism of the 1980s to the digital explosion of the 1990s, followed by the increasing diversification of illustration in the early twenty-first century. The book explores the contexts in which the discipline has operated and looks historically, sociologically, politically, and culturally at the key factors at play across each decade, while artworks by key illustrators bring the decade to life. Contemporary illustration's impact and influence on design and popular culture are investigated through introductory essays and profiles of leading practitioners, illustrated with examples of the finest work.

Contributors include: Margaret Atwood, Joan Bakewell, Bidisha, Lydia Cacho, Shami Chakrabarti, Lennie Goodings, Linda Grant, Natalie Haynes, Siri Hustvedt, Kathy Lette, Kate Mosse, Pussy Riot, Bee Rowlatt, Elif Shafak, Ahdaf Soueif, Sandi Toksvig, Natasha Walter, Timberlake Wertenbaker, Jeanette Winterson - alongside the three editors.

The German war in Russia was so brutal in all its extremes that all past experiences paled beside it. Everything in Russia—the land, the climate, the distances and above all the people—were harder, harsher, more unforgiving and more deadly than anything the German soldier had ever faced before. One panzer-grenadier who fought in the West and in Russia summed it up: In the West war was the same honourable old game; nobody went out of his way to be vicious, and fighting stopped often by five in the afternoon. But in the East, the Russians were trying to kill you—all the time. The four detailed reports of campaigning in Russia included in this invaluable book (*Russian Combat Methods in WWII*, *Effects of Climate on Combat in European Russia*, *Combat in Russian Forests and Swamps* and *Warfare in the Far North*) were written in the late 1940s and early 1950s, as part of the US Army programme to record the German strategies and tactics of World War II directly from the commanders. The authors were all veterans of the fighting they described, and frankly admitted that the soldiers sent to Russia were neither trained nor equipped to withstand the full fury of the elements there. The German high command had been under the impression that the Red Army could be destroyed west of the Dnepr, and there would be no need for conducting operations in cold, snow and mud. *Fighting in Hell* shows what really happened, through first-hand accounts of the commanders who were there.

This book will help you write better stories, spot and fix common issues, split stories so that they are smaller but still valuable, and deal with difficult stuff like crosscutting concerns, long-term effects and non-functional requirements. Above all, this book will help you achieve the promise of agile and iterative delivery: to ensure that the right stuff gets delivered through productive discussions between delivery team members and business stakeholders. Who is this book for? This is a book for anyone working in an iterative delivery environment, doing planning with user stories. The ideas in this book are useful both to people relatively new to user stories and those who have been working with them for years. People who work in software delivery, regardless of their role, will find plenty of tips for engaging stakeholders better and structuring iterative plans more effectively. Business stakeholders working with software teams will discover how to provide better information to their delivery groups, how to set better priorities and how to outrun the competition by achieving more with less software. What's inside? Unsurprisingly, the book contains exactly fifty ideas. They are grouped into five major parts: - Creating stories: This part deals with capturing information about stories before they get accepted into the delivery pipeline. You'll find ideas about what kind of information to note down on story cards and how to quickly spot potential problems. - Planning with stories: This part contains ideas that will help you manage the big-picture view, set milestones and organise long-term work. - Discussing stories: User stories are all about effective conversations, and this part contains ideas to improve discussions between delivery teams and business stakeholders. You'll find out how to discover hidden assumptions and how to facilitate effective conversations to ensure shared understanding. - Splitting stories: The ideas in this part will help you deal with large and difficult stories, offering several strategies for dividing them into smaller chunks that will help you learn fast and deliver value quickly. - Managing iterative delivery: This part contains ideas that will help you work with user stories in the short and mid term, manage capacity, prioritise and reduce scope to achieve the most with the least software. About the authors: Gojko Adzic is a strategic software delivery consultant who works with ambitious teams to improve the quality of their software products and processes. When Harold Ross founded The New Yorker in 1925, he called it a "comic weekly." And although it has become much more than that, it has remained true in its irreverent heart to the founder's description, publishing the most illustrious literary humorists in the modern era—among them Robert Benchley, Dorothy Parker, Groucho Marx, James Thurber, S. J. Perelman, Mike Nichols, Woody Allen, Calvin Trillin, Garrison Keillor, Ian Frazier, Roy Blount, Jr., Steve Martin, and Christopher Buckley. Fierce Pajamas is a treasury of laughter from the magazine W. H. Auden called the "best comic magazine in existence."

L'Ange: Book Two Only a privileged few know L'Ange's head of security Arman de Soto is a shifter, and even fewer know he's been systematically killing off a pack of werewolves. The reason for this vengeance is a secret Arman trusts with no one, quite the opposite of his obvious longtime pursuit of the chateau's overseer, Linus Hobbes. Despite Arman's reputation as a loner, the only thing he needs to complete his life is Linus. Predator and prey just don't mix—but Arman won't give him up. Linus has lived alone for more than seven years, sheltered at L'Ange under an assumed name and hiding secrets of his own, including his terrifying attraction to the most dangerous man he's ever met. Arman knows Linus should be afraid of the predator stalking him, but Linus is still drawn to him like a moth to a flame, no matter how much he tries to deny his instincts. It's not until Linus's past and Arman's crusade exposes their secrets and opens L'Ange to attack that Arman realizes waiting any longer is a risk he just can't take. So he'll have to take his quest to the source of the threat in a gamble to protect L'Ange, Linus, and any future they might have together.

The political scene is changing rapidly in America. The religious right is on the defensive, acceptance of gay rights is at an all-time high, social conservatives are struggling for relevance, and more Americans than ever identify as nonreligious. What does this mean for the country and the future? With these demographic shifts, can truly progressive, reason-based public policy finally gain traction? Or will America continue to carry a reputation as anti-intellectual and plutocratic, eager to cater to large corporate interests but reluctant to provide universal health care to all its citizens? Fighting Back the Right reveals a new alliance in the making, a progressive coalition committed to fighting for rational public policy in America and reversing the damage inflicted by decades of conservative dominance. David Niose, Legal Director of the American Humanist Association (AHA), examines this exciting new dynamic, covering not only the rapidly evolving culture wars but also the twists and turns of American history and politics that led to this point, and why this new alliance could potentially move the country in a direction of sanity, fairness, and human-centered public policy.

This revised and extended edition of the book Fields, Symmetries, and Quarks, originally published by McGraw-Hill Book Company, Hamburg, 1989, contains a new chapter on electroweak interactions which has also grown out of lectures that I have given in the meantime. In addition, a number of changes, mainly in the metric used, in the discussion of the theory of strong interactions, QCD, and in the chapter on hadron physics, have been made and errors have been corrected. The motivation for this book, however, is still the

same as it was 10 years ago: This is a book on quantum field theory and our present understanding of leptons and hadrons for advanced students and the non-specialists and, in particular, the experimentalists working on problems of nuclear and hadron physics. I am grateful to Dr. S. Leupold for a very careful reading of the revised manuscript, many corrections, and helpful suggestions and to C. Traxler for producing the figures and for constructive discussions.

International interest in the work of Avital Ronell has expressed itself in reviews, articles, essays, and dissertations. For *Fighting Theory*, psychoanalyst and philosopher Anne Dufourmantelle conducted twelve interviews with Ronell, each focused on a key topic in one of Ronell's books or on a set of issues that run throughout her work. What do philosophy and literary studies have to learn from each other? How does Ronell place her work within gender studies? What does psychoanalysis have to contribute to contemporary thought? What propels one in our day to Nietzsche, Derrida, Nancy, Bataille, and other philosophical writers? How important are courage and revolt? Ronell's discussions of such issues are candid, thoughtful, and often personal, bringing together elements from several texts, illuminating hints about them, and providing her up-to-date reflections on what she had written earlier. Intense and often ironic, *Fighting Theory* is a poignant self-reflection of the worlds and walls against which Avital Ronell crashed.
