this century he has helped reinvigorate national debate through public meetings, mass campaigns and appearances in the media, passionately bringing moral and political issues to wide audiences. And throughout, as ever, he has been keeping his diaries. Commenting on the demise of the New Labour project from the re-election of Tony Blair in 2001 to the ultimate foreign policy disasters of Afghanistan and Iraq, he gives other prescient accounts of the government's by-passing of Cabinet, parliament and the party, of the 'war on terror', the debate about Islam, globalisation and the changes in British society. Although he is no longer in power or in parliament, Tony Benn remains a figure of enormous respect whose direct views, honestly expressed, have often awakened the national conscience. His latest Diaries, human and challenging in turn, are an enthralling read.

The share of developing countries in the foreign direct investment is small, perhaps less than 30 percent of the total. The effects of this decline in the volume of foreign investment and the continued problem of capital flight have been aggravated by the serious fall in commercial bank lending to developing countries as a group and by a decline in official development assistance.

environment. These two perspectives are deeply intertwined, both from technological and social points of view, and the relationship between them currently represent the primary challenge for the field of Assistive Technology. This publication covers the proceedings of the 10th European Conference of the Association for the Advancement of Assistive Technology in Europe (<http://www.aaate.net>), the organisation which stimulates the advancement of assistive technology for the benefit of people with disabilities, including elderly people. This conference seeks to bridge the gap between these two complementary approaches, providing an opportunity to clarify differences and common points, and better define future direction. Topics covered by the conference include: technological innovation in assistive technology; the need for multidisciplinary approaches; equipment interconnectivity and compatibility; cultural aspects and the acceptance of different approaches; and the role of Europe in building inclusion competence worldwide.
