An original novel based upon the explosive new Star Trek TV series on CBS All Access! It is 2246, ten years prior to the Battle at the Binary Stars, and an aggressive contagion is ravaging the food supplies of the remote Federation colony Tarsus IV and the eight thousand people who call it home. Distress signals have been sent, but any meaningful assistance is weeks away. Lieutenant Commander Gabriel Lorca and a small team assigned to a Starfleet monitoring outpost are caught up in the escalating crisis, and bear witness as the colony's governor, Adrian Kodos, employs an unimaginable solution in order to prevent mass starvation. While awaiting transfer to her next assignment, Commander Philippa Georgiou is tasked with leading to Tarsus IV a small, hastily assembled group of first responders. It's hoped this advance party can help stabilize the situation until more aid arrives, but Georgiou and her team discover that they're too late—Governor Kodos has already implemented his heinous strategy for extending the colony's besieged food stores and safeguarding the community's long-term survival. In the midst of their rescue mission, Georgiou and Lorca must now hunt for the architect of this horrific tragedy and the man whom history will one day brand "Kodos the Executioner"....

"No matter your politics or home country this will change how you think about the movement of people between poor and rich countries...one of the best books on immigration written in a generation." --Matthew Desmond, author of *Evicted* The definitive chronicle of our new age of global migration, told through the multi-generational saga of a Filipino family, by a veteran New York Times reporter and two-time Pulitzer Prize finalist. When Jason DeParle moved in with Tita Comodas and her family in the Manila slums thirty years ago, he didn't expect to make lifelong friends. Nor did he expect to spend decades reporting on Tita, her husband, siblings, and children, as they came to embody the stunning rise of global migration. In his new book, DeParle paints an intimate portrait of an unforgettable family across three generations that dramatizes how the international movement of labor has reordered economics, politics, and culture across the world. At the heart of the story is Rosalie, Tita's middle child, who escapes poverty by becoming a nurse, and lands jobs in Jeddah, Abu Dhabi and, finally, Texas--joining the record forty-four million immigrants in the United States. Migration touches every aspect of global life. It pumps billions in remittances into poor villages, fuels Western populism, powers Silicon Valley, sustains American

health care, and brings one hundred languages to the Des Moines public schools. One in four children in the United States is an immigrant or the child of one. With no issue in American life so polarizing, DeParle expertly weaves between the personal and panoramic perspectives. Reunited with their children after years apart, Rosalie and her husband struggle to be parents, as their children try to find their place in a place they don't know. Ordinary and extraordinary at once, their journey is a twenty-first-century classic, rendered in gripping detail.

A lively dialogue between a foreign philosopher and a powerful statesman reflects the essence of Platonic reasoning on political theory and practice. It also embodies the philosopher's practical ideas about a utopian republic.

The starship Ariel is on a mission of the utmost secrecy, upon which the fate of thousands of lives depend. Though the ship is a mile long, its six crew are crammed into a space barely large enough for them to stand. Five are officers, geniuses in their field. The other is Will Kuno-Monet, the man responsible for single-handedly running a ship comprised of the most dangerous and delicate technology that mankind has ever devised. He is the Roboteer. Roboteer is a hard-SF novel set in a future in which the colonization of the stars has turned out to be anything but easy, and civilization on Earth has collapsed under the pressure of relentless mutual terrorism. Small human settlements cling to barely habitable planets. Without support from a home-world they have had to develop ways of life heavily dependent on robotics and genetic engineering. Then out of the ruins of Earth's once great empire, a new force arises - a world-spanning religion bent on the conversion of all mankind to its creed. It sends fleets of starships to reclaim the colonies. But the colonies don't want to be reclaimed. Mankind's first interstellar war begins. It is dirty, dangerous and hideously costly. Will is a man bred to interface with the robots that his home-world Galatea desperately needs to survive. He finds himself sent behind enemy lines to discover the secret of their newest weapon. What he discovers will transform their understanding of both science and civilization forever... but at a cost.

From New York Times bestselling author Eleanor Henderson comes a turbulent love story meets harrowing medical mystery: the true story of the author's twenty-year marriage defined by her husband's chronic illness—and a testament to the endurance of love Eleanor met Aaron when she was just a teenager and he was working at a local record store—older, experienced, and irresistibly charming. Escaping the clichés of fleeting young love, their summer romance bloomed into a relationship that survived college and culminated in a marriage and two children. From the outside looking in, their life had all the trappings of what most would consider a success story. But, as in any marriage, things weren't always as they seemed. On top of the typical stresses of parenting, money, and work, there were the untended wounds of depression, addiction, and childhood trauma. And then one day, out of nowhere: a rash appeared on Aaron's arms. Soon, it had morphed into painful lesions covering his body. Eleanor was as baffled as the doctors. There was no obvious diagnosis, let alone a cure. And as years passed and the lesions gave way to Aaron's increasingly disturbed concerns about the source of his sickness, the husband she loved seemed to unravel before her eyes. A new fissure ruptured in their marriage, and new questions piled onto old ones: Where does physical illness end and mental illness begin? Where does one person end and another begin? And how do we exist alongside someone else's suffering? Emotional, intimate, and at times agonizing, *Everything I Have Is Yours* tells the story of a marriage tested by powerful forces outside both partners' control. It's not only a memoir of a wife's tireless quest to heal her husband, but also one that asks just what it means to accept someone as they are.

Battles of terrifying proportion are imminent, and it will take the combined forces of all the kingdoms to stop the Hythariam army. Little do they know that their actions could have disastrous and apocalyptic consequences. Forty years in the future, Bayen is brought out of cryostasis to a hellish, war-torn world on the brink of destruction. Everyone he knows and loves is dead, but hope remains. The cruel and gritty future of Safanar can be averted if Bayen travels back to protect the most heinous villain in recorded history. Both failure and success may end his life, but victory alone will prevent the end of the world. "Heir of Shandara" is the fourth installment in the Safanarion Order, an unconventional fantasy series that mixes sword and sorcery with science fiction.
