The aim of this book is to analyze clusters of similar "elementary" occurrences that serve as the building blocks of more global events. Making connections between seemingly unrelated case studies, Roehner and Syme apply scientific methodology to the analysis of history. Their book identifies the recurring patterns of behavior that shape the histories of different countries separated by vast stretches of time and space. Taking advantage of a broad wealth of historical evidence, the authors decipher what may be seen as a kind of genetic code of history.
