beach or riverbank all the more interesting. From the humble flint, to feldspar veins, spotted slates, serpentinite, granite ovoids and the holy grail of pebble hunting, the rare rhomb porphyry (with distinctive diamond-shaped crystals nestled in dark-brown rock). The book includes a space to ruminate on your own findings, taking note of the treasures that you pick up along the way. The Pebble Spotter's Guide is the perfect introduction to everything you didn't know there was to know about the mindful pleasure of pebble spotting. Simply sit on a beach or next to a stream for 10 minutes and find amazing treasures at your feet; there is much to find.

Keep this tabbed booklet close at hand on your next rock-hunting adventure. Based on Dan and Bob Lynch's best-selling field guides and featuring 60 of the most common rocks and minerals in the country, the booklet is organized by rocks/minerals and then by general appearance for quick and easy identification. Narrow your choices by appearance, and view just a few specimens at a time. The pocket-sized format is much easier to use than laminated foldouts, and the waterproof and tear-resistant pages help to make the book durable in the field.

These brand new cards in the Spotter's Guide series are perfect for spotters both young and old. Also features clear and detailed illustrations and a rocks and fossils glossary. The pocket-sized cards make an easy, convenient and informative companion for country walks and outdoor excursions.

what stories rocks tell? If so, then this is the guide for you. The Field Guide to the Identification of Pebbles , a full colour, laminated, accordion folded, easy to use guide with over 80 beautiful photographs of pebbles from beaches and rivers. Use the photos to identify over 28 different types of rocks and minerals. A great resource for Earth Science curriculum units in schools, the short text deals with how rocks form and how to tell if a rock is igneous, sedimentary or metamorphic. It also provides some fun facts about minerals in our daily lives. Some children fight sleep with all their might. And we can see why - it is so exciting to be awake! But nobody can live without sleep, which is why we've created this bedtime ABC, a book with the power to have everyone nodding off long before the alphabet ends. It never fails. Some people begin to yawn by the letter 'B'; others go out like a light at 'P'. Almost all arrive at the 'S' page already snoring. Even the title of the book fell asleep.

Features tips on observing the heavens and presents facts on the constellations, stars, planets, comets, asteroids, meteors, eclipses, and artificial satellites.

Ideal field guides for both children and adults.

This novel of love in the world of 1950s vaudeville is a masterwork of literary magic from the Booker Prize-winning author of *Last Orders* and *Mothering Sunday*. It is 1959 in Brighton, England, and the theater at the end of the famous pier is having its best summer season in years. Ronnie, a brilliant young magician, and Evie, his dazzling assistant, are top of the bill, drawing a full house every night. And Jack is everyone's favorite master of ceremonies, holding the whole show together. But as the summer progresses, the drama among the three begins to overshadow their success onstage, setting in motion events that will reshape their lives. Vividly realized,

tenderly comic, and quietly shattering, *Here We Are* is a masterly work of literary magic.

Why do we pick up pebbles on the beach? What is it we see in them, and why do we take them home to display on our shelves? Is it their inherent beauty, their infinite variation, or simply their associations with a happy time and place? In this book - part social history and part practical guide - writer and pebble collector Christopher Stocks unearths the sometimes surprising story of our love-affair with pebbles, and considers how the way we see them today has been influenced over the years by artists, authors and even archaeologists. Printmaker Angie Lewin is widely admired for her alluringly stylish images of the natural world. She celebrates the experience of walking and sketching along the British coastline, often incorporating pebbles in her limited edition prints and paintings. Many of these feature in the book alongside a series of new images.

A comprehensive, illustrated identification guide for beginners and serious collectors alike, featuring special color photography of specimens held at the Natural History Museum, London. Rocks and minerals are naturally occurring compounds formed by intense geological processes in the Earth's crust such as volcanic eruptions. With striking color photography of rocks and minerals from around the globe, this detailed and easy-to-use guide is designed to help readers identify specimens and begin collecting. Fully fact-checked by the Department of Mineralogy at the Natural History Museum, London, this guide will give you geological knowledge at your fingertips.
