Praise for the First Edition: "There are many policy books, but none are written by APRNs or focus just on APRN practice...APRNs are at the core, or can be, if they use their practice knowledge and education to shape policy...[The] editors eloquently make the case that policy formation is a critical nursing skill."

--Doody's Medical Reviews The only book of its kind, this text offers a wealth of information about the role of all types of APRNs (NPs, CNSs, CNMs, and CRNAs) in influencing the development and application of health care policy in a wide range of specialties. Featuring nine completely new chapters, the second edition delivers an invigorated focus on developing policy that advocates for vulnerable populations and discusses how the incorporation of interprofessional education has changed and will continue to alter health policy in the U.S. and internationally. The text also discusses the evolving influence of the Patient Protection Affordable Care Act (PPACA) and the implications of current and future health policy changes that will be impacting the practice of various APRN roles. Authored by APRN luminaries who have been closely involved with health policy development, the text meets the requirements of the IOM report on The Future of Nursing and the DNP criteria V for the inclusion of health policy and

advocacy in the curriculum. This "call to action" for APRNs is specifically designed for courses enrolling students from a variety of APRN trajectories, and includes content from all APRN role perspectives in every section. New to the Second Edition: Emphasizes policy development advocating for vulnerable populations Discusses the current and future influence of interprofessional education on health policy in the U.S. and worldwide Addresses how health policy changes will impact the various APRN roles Includes nine new chapters on: Health Policy and its Effect on Large Systems, Value-Based Purchasing, Health Care Reform and Independent Practice, Health Policy Implications Regarding Substance Abuse/PTSD Treatment, Genetics, Competency Issues, and The International Council of Nurses Key Features: Addresses role-specific policy needs of all four APRN roles and DNPs Encompasses all requisite information about health care policy and reform in the U.S. and worldwide and its impact on advanced practice nursing Meets the requirements of IOM's The Future of Nursing and DNP criteria V Explains how and why APRNs can and should influence policy development Discusses implications of not participating in health policy decisions

Published for the Australian and New Zealand market. Provides an overview of key concepts in perioperative care, and includes case studies throughout.

The two-volume "Manual of Nursing" is a comprehensive and up-to-date work on the nursing profession in South Africa. It covers the whole nursing curriculum and broadens the student's scope of knowledge by discussing subjects not included in midwifery, critical care nursing, community nursing and psychiatric nursing. Easy referencing ensures that the set (encapsulating the integrated nursing course) is of immediate and practical use. This work discusses medical and surgical conditions from a nursing perspective. Volume One introduces certain basics of nursing theory and practice and it includes a section dealing with nursing-related services.

Contributors discuss how to facilitate care in a multicultural environment and the impact of culture on care. Essential for baccalaureate nursing faculty and students, and for associated health profession educators and students.

The midwife's role is examined in the community and family-health context in this handbook on effective maternal and newborn care for midwives and other healthcare providers. The skills, competencies, and knowledge required to make informed decisions about neo- and postnatal care are covered, including anatomy and the physiology of reproduction, high-risk pregnancies, and labor and birth. Theoretical and practical issues illuminate a midwife's role in the prevention of illness in mothers and babies, with attention to the unique

challenges of midwifery in developing nations. Insights from current research studies and critical questions about midwife practice will help those new to health care understand the unique challenges of this form of health-service delivery. This text gives an account of the course charted by black nurses in South Africa as they rose to the challenge of a foreign, Western system of nurse education and training. It records the professional and academic advances made by an indigenous people in this field within a relatively short time.

The Professional Development of Nursing and Midwifery in Ireland: Key Challenges for the Twenty-First Century provides a unique overview of the many changes that are taking place in the Irish health services, and details how they will continue to affect the professions of nursing and midwifery. It explores how nurses and midwives interact with others in the health services and how nursing and midwifery are a rich resource in the delivery of an efficient and effective healthcare service. This book is a comprehensive guide to what it means to be a nurse or midwife in today's Irish health services. It is essential reading for all those involved in nursing and midwifery education (both students and educators), and is a reference book for clinical practitioners, employers and all those involved in the formulation of policies for the health services and the regulation of the professions.

The 5th edition of Bioethics provides nursing students with the necessary knowledge and understanding of the ethical issues effecting nursing practice. Groundbreaking in its

first edition, Bioethics continues its role as a vital component of nursing education and provides a framework for students to understand the obligations, responsibilities and ethical challenges they will be presented with throughout their careers. This latest edition responds to new and emerging developments in the field and marks a significant turning point in nursing ethics in that it serves not only to inform but also to revitalise and progress debate on the issues presented.

Midwifery Preparation for Practice 2e is the only text which reflects the historical and socio – political environment in which midwives in Australia and New Zealand practice. In addition, it is the only text which incorporates the philosophy and standards endorsed by New Zealand and Australian Colleges of Midwives while also focusing on the partnership between midwives with women and the woman- centred model of midwifery care. The second edition has built on the existing philosophy and structure of Midwifery: Preparation for Practice, though with a greater emphasis on the development of critical thinking and researching skills. Key chapters have been re-written to reflect recent changes in government legislation while current research and pertinent examples are included throughout the text. This new edition is supported by a comprehensive suite of resources for both Instructors and Students using the Evolve website as a platform. These ancillaries will re-enforce the critical thinking elements for students with interactive case studies and scenario based learning exercises as well as the multiple choice questions. This collection of essays reflects the current interdisciplinary and international nature of the history of nursing scholarship. Covering a range from the eighteenth to the twentieth century, this book draws on research from eleven different countries to address: the issues of professionalism within nursing the social and ethical issues which are woven into the relationship between the nurse/midwife and her patient/client the trans-cultural dimensions nurses create when they move from one culture to another and the recent developments in historiography.

THE FIRST BOOK TO PRESENT THE SUCCESSES, CHALLENGES, AND OPPORTUNITIES OF GLOBAL HEALTH NURSING This text is designed specifically for nurses and nursing students who have an interest in global health as a specialty, regardless of experience or education level. It reflects both the unique contributions of the nursing profession

and of other disciplines, which is in keeping with the editors' perspective on how to bring about lasting change. The text views global health through a nursing lens, but maintains this awareness and appreciation of interprofessionalism throughout. The editors and contributors have firsthand experience of the complex dynamics in achieving global health, and bring a wealth of knowledge to this important field, which has grown as a course and specialty. The text depicts the worldwide expansion of nursing partnerships between resource-rich and resource-limited countries, discusses challenges and obstacles, and provides cases and guidance on how to achieve global health. It will appeal to all nurses, from student nurses embarking on a global health experience to more experienced global health nurses who offer professional nursing expertise from around the world. The text responds to a recent WHO mandate, which seeks the input of nurses and midwives as part of an interprofessional team of key strategists for facilitating global health. "The Lancet" report is also an important document used throughout the text, and an interview with Dr. Julio Frenk, author of that report, is included. Social, political, cultural, economic, and environmental factors--including climate change--are integrated into determinants of global health. The text covers the foundations of global health, including the emerging concept of climate justice, the ethical context of global health, and the importance of interprofessional education. It addresses key issues of global health with a focus on poor and vulnerable individuals--particularly women and children--and those living in areas of conflict. In addition to describing notable accomplishments toward achieving global health, the book focuses on the need for increasing access to primary care, improving clinical practice through expanded education, and engaging interdisciplinary researchers in discovery of viable solutions. The book includes the perspectives of nurses and

colleagues from other disciplines in both resource-rich and resource-limited countries. This book is not about the political history of Apartheid South Africa; it is about an extraordinary South African woman's life. It depicts where she was born, and chronicles her courageous journey into exile to Lesotho, Zambia, Zaire, and Britain, culminating with a diplomatic assignment in the United States of America. This is where the politics of the day intersects with personal lives, making us all more deeply appreciative of how profoundly the 'personal is political'.

The basics of fundamental and general nursing science are presented in this health resource for auxiliary, enrolled, and registered general nurses. A strong community nursing focus infuses the outcome-based teachings and questions to stimulate further discussion. Practical information on nursing in South Africa is provided, including working in the legal framework, managing the challenges of nursing in a culturally diverse society, and dealing with patients suffering from HIV and AIDS. Medical teachings on the use of oxygen, temperature regulation, mobility, and skin integrity complement the ethical discussions.

Essentials of Law for Health Professionals 3e has been thoroughly revised and updated throughout to reflect the most recent changes in legislation relevant to the provision of health care services in Australia. Employment status of health professionals and issues of work cover, health and safety obligations, anti-discrimination issues are clearly outlined and discussed in the new edition. Legal issues surrounding genetics, fertility and surrogacy are reviewed in conjunction with the current position on abortion and wrongful deaths. The breadth of material is presented in a manner that is more in keeping with a student resource text rather than a law book. It emphasises major points and includes summaries on how the law relates to practice rather than merely stating the law. The new third edition continues to present contemporary issues relevant for Health Science students from the clinical setting through to management and employment, as they apply to each state. Streamlined new edition includes updates to key chapters such as: Chapter 5 Negligence, which has been completely rewritten to discuss negligence by jurisdiction Chapter 8 Manipulation of Life now deals with topical and controversial issues such as abortion, wrongful death, tissue transplants, genetics and infertility Chapter 10: Contractual and Industrial Elements of Professional Practice has been updated to include the most recent changes to Industrial Relations Law, information that is essential for any Health

Professional entering into employment. Chapter 11: Statutes Controlling Health Service Delivery has been revised with respect to drugs and continues to provide the significant legislation most likely to impact on the daily practice of the health professional namely poisons, mental health legislation, child and elder abuse, and the notification of births and deaths. New Chapter 12: Registration and Regulation of Health Professionals highlights the contemporary issues faced by health professionals with the implementation of National Registration. Addition of legislation regulating research and a discussion of the legislative and common law controls on conducting research within Australian healthcare systems - National Health and Medical Research Council Act Update all appendices and include the Decision Making Framework for Nurses plus Glossary Takes a multidisciplinary approach to the subject of health care law and includes case-studies and activities. Discussion on the implications of evidence-based practice on the standard notionally attributed to the duty of care.

This book is distinctive in its focus on Advanced Practice Nursing leadership globally. It has a unique structure, first highlighting global APN leadership and then including case studies on leadership from various regions around the world. This beneficial and practical book has a specific emphasis on academic, clinical and policy leadership and is relevant for all readers. Finally, a section on

leadership development focuses on coaching and mentoring, business acumen, collaboration and patient advocacy provides an important contribution. Authors are distinguished APN leaders from around the world along with junior authors who are emerging leaders being mentored by these leaders. This book will appeal to APN clinicians, students and emerging leaders who want to bring important global lessons to their work. The book will become an indispensable part of the libraries of all APN leaders at all stages in their development worldwide.

Advances in the biomedical sciences have raised pertinent, and often paradoxical, questions concerning the relationship between women's health and their rights. This book, based on the Round Table on Bioethics and Women held at UNESCO during the Fourth Session of the International Bioethics Committee (IBC), presents the experience of field workers and actors in areas as diverse as health, legal affairs, governance, education and psychology. It takes into account both the various stages of the biological life span and the insertion of women in a particular socio-economic and cultural context. Although the book does not claim to be exhaustive, it shows to what extent the specificity of issues related to women in relation to bioethical issues has sometimes been underestimated. Based on numerous socio-cultural experiences throughout the world, it also

provides a useful general view for readers who wish to pursue research or studies in this field. [UNESCO website]

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training,

skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing. Midwifery across the globe faces different issues. In some countries the autonomy of the profession is a tradition, while in some societies midwives struggle to practice autonomously the basic competencies. In one part of the world the medicalisation of childbirth is the main issue, preventing the natural processes of pregnancy and childbirth to flow at their own pace, while in other parts of the world midwives struggle with lack of resources to provide safe midwifery care. The authors of this book practice midwifery in different cultures and within different social contexts. They have to deal with different obstacles and seek solutions to diverse problems. With their contributions, they offer an insight into their thinking, their dilemmas, and the problems of midwifery practices in their countries. However, despite different backgrounds, they all have in common a uniform goal - a wish to offer women optimal midwifery care and to improve midwifery services.

The new edition of Psychiatric and Mental Health Nursing focuses on practice in mental health and psychiatric care integrating theory and the realities of practice. Mental wellness is featured as a concept, and the consideration of a range of psychosocial factors helps students contextualise mental illness and psychiatric

disorders. The holistic approach helps the student and the beginning practitioner understand the complex causation of mental illness, its diagnosis, effective interventions and treatments, and the client's experience of mental illness.
