With the same brilliant combination of humor and warmth she brought to bestseller Bird by Bird, Anne Lamott gives us a smart, funny, and comforting chronicle of single motherhood. It's not like she's the only woman to ever have a baby. At thirty-five. On her own. But Anne Lamott makes it all fresh in her now-classic account of how she and her son and numerous friends and neighbors and some strangers survived and thrived in that all important first year. From finding out that her baby is a boy (and getting used to the idea) to finding out that her best friend and greatest supporter Pam will die of cancer (and not getting used to that idea), with a generous amount of wit and faith (but very little piousness), Lamott narrates the great and small events that make up a woman's life. "Lamott has a conversational style that perfectly conveys her friendly, self-deprecating humor." -- Los Angeles Times Book Review "Lamott is a wonderfully lithe writer Anyone who has ever had a hard time facing a perfectly ordinary day will identify." -- Chicago Tribune

The child from twelve to twenty-four months of age is a joy to have around—some of the time, that is. This child is growing at an incredible rate, learning to walk, learning to touch, learning to love, and learning to say “No!” for the first time. All of this can be quite a handful for the new parent. In this first book in the series from the renowned Gesell Institute, which includes Your One-Year-Old through Your Ten- to Fourteen-Year-Old, the authors discuss all important questions that concern the twelve- to twenty-four-month-old child. They examine the various stages of development between infancy and toddlerhood: what new things the child can do; how the child acts with parents and other people; what the child thinks and feels. Included in this book: • Sleeping and feeding routines • A one-year-old's view of the world—and herself • Accomplishments and abilities • The basics of toilet training • Stories from real life • A list of age-appropriate toys and books • A bibliography for parents “Louise Bates Ames and her colleagues synthesize a lifetime of observation of children, consultation, and discussion with parents. These books will help parents to better understand their children and will guide them through the fascinating and sometimes trying experiences of modern parenthood.”—Donald J. Cohen, M.D., Director, Yale Child Study Center, Irving B. Harris Professor of Child Psychiatry, Pediatrics, and Psychology, Yale School of Medicine

A Simon & Schuster eBook. Simon & Schuster has a great book for every reader.

Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

The New Childcare Bible—A Must-Have Whether You Have Occasional Sitters or a Full-Time Nanny Finding the right caregiver can be one of the most life-changing decisions a parent makes. Whether it's a kindly neighbor for the weekday latchkey hours, a teenage babysitter one night a week, or a full-time professional nanny, the right caregiver can enrich a child's world and literally grow her brain. Hire the wrong one, and this person could cause developmental delays and stress for the entire family. In her groundbreaking new book, *Secrets of the Nanny Whisperer: A Practical Guide for Finding and Achieving the Gold Standard of Care for Your Child*, nationally recognized parenting expert Tammy Gold draws from her extensive background in child developmental psychology, social work, and family therapy to offer the first childcare bible for parents. Knowing the impact caregivers have on children coupled with the unregulated often unknown world of in-home childcare workers, Gold has devoted her professional career, and now this book, to helping parents navigate through this important--and woefully overlooked--process. She arms parents with invaluable tools, tips, and insider secrets to finding the perfect caregiver-family match. Gold's Family Needs Assessment helps parents identify the traits and conditions that are "must-haves," added "pluses," or nonnegotiable "deal breakers." Parents can then use this list of qualities to quickly weed out unqualified candidates. She also details what to ask over the phone and in a face-to-face interview, how to structure a trial run (which she deems essential), and what to spell out in a Nanny-Family Work Agreement--another essential tool included in the book. Readers learn her "Nanny Speak 1-2-3" technique to help clarify and resolve issues with the caregiver in a productive, positive way. In addition to saving hours and energy, Parents will also discover as much about parenting as they will about finding a nanny. *Secrets of the Nanny Whisperer* is chock-full of parenting gems about children's developmental stages, ways to nurture and stimulate the child, and essential strategies for maintaining harmonious and high-functioning parent-child-caregiver relationships. This book is a must read for parents who want to create a happier, healthier and safer childcare experience for their child.
