The 2013-2014 Ebola epidemic was the deadliest ever--but the outbreaks continue. Now comes a gripping account of the doctors and scientists fighting to protect us, an urgent wake-up call about the future of emerging viruses--from the #1 bestselling author of The Hot Zone, now a National Geographic original miniseries. This time, Ebola started with a two-year-old child who likely had contact with a wild creature and whose entire family quickly fell ill and died. The ensuing global drama activated health professionals in North America, Europe, and Africa in a desperate race against time to contain the viral wildfire. By the end--as the virus mutated into its deadliest form, and spread farther and faster than ever before--30,000 people would be infected, and the dead would be spread across eight countries on three continents. In this taut and suspenseful medical drama, Richard Preston deeply chronicles the outbreak, in which we saw for the first time the specter of Ebola jumping continents, crossing the Atlantic, and infecting people in America. Rich in characters and conflict--physical, emotional, and ethical--Crisis in the Red Zone is an immersion in one of the great public health calamities of our time. Preston writes of doctors and nurses in the field putting their own lives on the line, of government bureaucrats and NGO administrators moving, often fitfully, to try to contain the outbreak, and of pharmaceutical companies racing to develop drugs to combat the virus. He also explores the charged ethical dilemma over who should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster. Crisis in the Red Zone makes clear that the outbreak of 2013-2014 is a harbinger of further, more severe outbreaks, and of emerging viruses heretofore unimagined--in any country, on any continent. In our ever more interconnected world, with roads and towns cut deep into the jungles of equatorial Africa, viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before. The more we discover about the virosphere, the more we realize its deadly potential. Crisis in the Red Zone is an exquisitely timely book, a stark warning of viral outbreaks to come.

NEW YORK TIMES BESTSELLER • A woman who longs to avoid risk at all cost learns that men who love danger are the most exciting in this moving novel from New York Times bestselling author Danielle Steel. After a carefree childhood, Mary Margaret Kelly came of age in the shadow of grief. Her father, a dashing daredevil Air Force pilot, died when she was nine. Maggie saw her mother struggle to put their lives back together. As the family moved from one city to the next, her mother warned her to beware of daredevil men and avoid risk at all cost. Following her mother's advice, and forgoing the magic of first love with a high school boyfriend who was too wild to feel safe, Maggie instead sought out all the things her mother had lost—a predictable partner, a stable home, and a regular paycheck. She chose to marry a dependable, kind man who was a reliable husband and successful accountant. Together they had a son and found happiness in a conventional suburban life. Until tragedy struck again. Now on her own, feeling a sense of adventure for the first time, Maggie decides to face her fears, setting off on a whirlwind trip from San Francisco to Rome, Paris, and Monaco. But when her travels reconnect her with the very same irresistible, thrill-seeking man she's spent thirty years trying to forget, Maggie becomes terrified that rushing into love and sharing his life may very well end in disaster. But ultimately, while Maggie tries to outrun her fears and painful memories of her past, fate will surprise her in the most astounding of ways, as she walks the tightrope between danger and courage, and between wisdom and love.

The Government's Motorcycling Strategy was published in February 2005, with the aim of facilitating motorcycling as a choice of travel within a safe and sustainable transport framework. It had a strong focus on safety including provision on the highway, including road design and maintenance; encouraging safer bike design; promoting correct helmet fitting; and improving rider training. This inquiry looks at the progress in implementing the strategy. In addition it also considers changes to motorcycle licensing arrangements and action that might be taken to reduce the risk posed by mini-motos and go-peds.

The Threat From Within By: Gilbert Lewis The ISIS high command is angry that the hostage operation has failed. They conclude that their main obstacle is the MI6 operative, Estella "Rose" Mathews. Rose and a combined team of British and French Special Forces successfully rescued the six hostages from England, France, and the United States. After the hostages were successfully rescued, ISIS now plans an attack using their western fighters. Again, these attacks are prevented by western intelligence agencies. ISIS has now moved its attack to the America Homefront. MI6 assigns Rose to the CIA. The CIA, in turn, assigned Rose to work covertly with the American company White Mountain Analytics (WMA). ISIS develops a fool-proof-plan to kill Rose. They have posted a "kill contract" on the darknet to assassinate Rose. The posting of the "kill contract" is answered by Adolf Wolfgang (Wolf) Schneider. Wolf was in the Marines and was given a dishonorable discharge. He blames his being booted from the Marines on a black captain. Wolf grew up in Kentucky with a father who blamed all of his failures on the "blacks." Wolf grew up in an environment of "White Supremacy" thus, him being booted from the Marines only strengthen his hatred for Negros, slant eyes and beaners. Upon being booted from the Marines, Wolf found his way to KKK camps in Montana and Tennessee. Within two years he was the top dog. The KKK camp sells drugs brought in illegally from Mexico. Wolf quickly spreads the KKK enterprise to gun running and prostitution. Wolf's expertise is "sniper" kills. His motto is "One Shot, One Kill." He learned the trade in the Marines. When Wolf answered the post to kill Rose, he already had completed kills on mafia rats, crooked politicians, and police officers who have not honored their contract to the mafia. So far, he finds it easy money. Each kill brings in an average of \$100K. Wolf checks on the darknet monthly for easy kills. His contract to kill Rose is \$600K. The story unfolds as Rose is tipped off that there is a kill contract on her life. Rose and members of WMA determine that the assassin is a member of a White Nationalist camp in Tennessee. The WMA team discovers that the camp is involved in illicit drugs, opioids, gun-running, and forced prostitution. When the prostitutes are no longer needed, they use them in snuff movies. Rose and her team of experienced special operations personnel and the FBI engage in a long siege. As the siege continues, President Trout in his rallies is bad-mouthing the FBI. The crowd surrounding the White Nationalist camp is turning against Rose and the FBI. They must quickly and carefully attack and turn the general public against the tide of support for these domestic terrorists.

Way to Go brings together two epic motorcycle journeys, from Belfast to Delhi on a loyal Enfield, and from Chicago to LA on a Harley Davidson. A thoughtful, hilarious, off-beat adventure story by award-winning travel journalist Geoff Hill.

Seth Johnson's debut story collection comprises twelve linked tales set in Kentucky against the backdrop of the disintegration of a young marriage amidst thwarted expectations and contrasted by illustrations of the unconditional love freely given by dogs. A man on the run hides out at a boarding house owned by a paraplegic woman whose uncle's dog gives birth with an ease that impresses the observers of this ordinary event. A young man confesses his extramarital affairs to his mother. A housewife attends the funeral of a young woman whom she never knew. In precise, evocative prose, *The Things We Do for Women* explores the perpetual desire for love and the obstacles to obtaining it.

The former director of communications at Harley-Davidson and one of the most sought-after speakers in the world reveals his exhilarating, innovative approach to creating customer loyalty and marketplace dominance. Ken Schmidt is a wanted man. His role in transforming Harley-Davidson Motor Company—one of the most celebrated corporate success stories in history—led business leaders all over the world to seek his guidance. After all, how many companies can get their customers to tattoo their logo on their arms? After having worked with more than one thousand companies worldwide, Schmidt is ready to share the secrets that spurred Harley-Davidson's remarkable turnaround. An avid motorcycle enthusiast, Schmidt harnessed his passion for riding to create his famed Noise Cubed Trilogy—the three questions he asks every one of his clients. They assess a company's positioning, competitiveness, and reputation, and are the key ingredients for any successful corporation: What do the customers your business served yesterday say about your business when they're talking about you to prospective customers? What do you want them to say? What are you doing to get them to say it? In *Make Some Noise*, Schmidt shares his full-throttle approach for businesses and individuals alike. Anyone looking to become more competitive and grow customer loyalty can learn from the case studies and experiences he shares. From a nondescript heavy construction company, to the most high-end "luxury" gas station in America, to Apple, and to his own personal landscaper, Schmidt illustrates how the answers to his trio of questions will yield a course of action to stand out in today's marketplace.

Bernt Spiegel's *The Upper Half of the Motorcycle* was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set.

In this book you will meet three dozen impatient people. They weren't satisfied with the slow, plodding, money-saving route to financial security, the safe route that most of us feel stuck with. They wanted instant wealth - and they got it. As Max Gunther points out, our folklore frowns on the idea of quick money. Our cultural heroes have generally been plodders, as in the fable about the race between a tortoise and a hare. "In the fable, the hare loses. The stories in this book are not fables. They are true. In these stories, the hares win." They are a richly varied lot, these happy hares. Gunther opens with a few dazzling millionaire legends, such as the man who invented Monopoly. You'll then meet such fascinating characters as: - Sam Wyly, who made it in the computer industry - Harvey Shuster, who beat the stock market - Dan Renn, who grew rapidly rich by applying salesmanship to another man's idea - Howard Brown, who deliberately decided to be rich and became a multi-millionaire within three years. - A group of men who made fast fortunes on fads such as the Hula Hoop and the Frisbee. - Jean Nidetch, who organised the fabulously successful Weight Watchers These stores illustrate that the dream of quick money isn't such a ridiculous dream after all. Maybe you've been harboring this kind of dream yourself. You've squelched the dream because you've been brainwashed by too many stories about tortoises beating hares. Everybody tells you your dream is laughable, impractical. All right, get ready for a revelation. Read this delightful collection of tales about hares who won. When you've read them, maybe you'll decide to run with them.

For Terrell Matheus, the decision to lie about his brother's death is an immediate reaction to the panic he feels at having shot him. What he has not considered when placing the blame on a truck full of white boys are the ramifications—the near riots and the vigilante anger that threaten innocent men. Terrified to admit his guilt, he watches in dismay as schoolmates make a public display of support, and in horror as his uncle seeks vengeance. Finally, unable to live with his lie and the anger it creates in the town's black community, he is forced to come to terms with the terrible truth and the incalculable hurt he has caused his parents, who have effectively lost both sons with a single shot. Though he is not sent to jail, Terrell finds himself in a prison of another kind. Shunned by former friends and forced to live away from home, he finds unexpected solace in the friendship of his dead brother's girlfriend, who stands by him as he struggles to rebuild his life. Set in Evansville, Indiana, in the mid-1970s, *The Lie* is imbued with a perfect sense of time and place. It is a startling and controversial novel about family, redemption, and the price of honesty.
