WANT A NON-CODING JOB AT A TECH COMPANY? Interested in product management, marketing, strategy, or business

development? The tech industry is the place to be: nontechnical employees at tech companies outnumber their engineering counterparts almost 3 to 1 (Forbes, 2017). You might be worried that your lack of coding skills or tech industry knowledge will hold you back. But here's the secret: you don't need to learn how to code to break into the tech industry. Written by three former Microsoft PMs, *Swipe to Unlock* gives you a breakdown of the concepts you need to know to crush your interviews, like software development, big data, and internet security. We'll explain how Google's ad targeting algorithm works, but Google probably won't ask you how to explain it in a non-technical interview. But they might ask you how you could increase ad revenue from a particular market segment. And if you know how Google's ad platform works, you'll be in a far stronger position to come up with good growth strategies. We'll show you how Robinhood, an app that lets you trade stocks without commission, makes money by earning interest on the unspent money that users keep in their accounts. No one will ask you to explain this. But if someone asks you to come up with a new monetization strategy for Venmo (which lets you send and receive money without fees), you could pull out the Robinhood anecdote to propose that Venmo earn interest off the money sitting in users' accounts. We'll talk about some business cases like why Microsoft acquired LinkedIn. Microsoft interviewers probably won't ask you about the motive of the purchase, but they might ask you for ideas to improve Microsoft Outlook. From our case study, you'll learn how the Microsoft and LinkedIn ecosystems could work together, which can help you craft creative, impactful answers. You could propose that Outlook use LinkedIn's social graph to give salespeople insights about clients before meeting them. Or you could suggest linking Outlook's organizational tree to LinkedIn to let HR managers analyze their company's hierarchy and figure out what kind of talent they need to add. (We'll further explore both ideas in the book.) Either way, you're sure to impress. Learn the must know concepts of tech from authors who have received job offers for Facebook's Rotational Product Manager, Google's Associate Product Marketing Manager, and Microsoft's Program Manager to get a competitive edge at your interviews!

UnMarket to build trust and make lifelong customers! In 2009, Scott Stratten and Alison Stratten wrote the bestselling UnMarketing: Stop Marketing, Start Engaging and began a journey that would take them around the world sharing their message of engagement with corporations, entrepreneurs, and students. They are now back with this second edition, because Everything has Changed and Nothing is Different, with all the brilliance of the first edition, plus new content and commentary to reflect the rapidly changing landscape we all live, buy, and work in today. For generations, marketing has been hypocritical. We've been taught to market to others in ways we hate being marketed to (cold-calling, flyers, ads, etc.). So why do we still keep trying the same stale marketing moves? UnMarketing shows you how to unlearn the old ways and consistently attract and engage the right customers. You'll stop just pushing out your message and praying that it sticks somewhere. Potential and current customers want to be listened to, validated, and have a platform to be heard—especially online. With UnMarketing, you'll create a relationship with your customers, and make yourself the logical choice for their needs. We know you've been told to act like other people, talk like other people, and market like all the people, but it is time for you to unlearn everything and start to UnMarket yourself.

UnMarketing includes the latest information on: Idea Creation, Viral Marketing and Video, Marketing to Millennials, Authenticity, Transparency and Immediacy, Ethics and Affiliates, Social Media Platforming, UnPodcasting, Word of Mouth, Customer Service, Consumer Advocacy and Leadership. "Product management isn't about you and it isn't about your product. It's about solving problems for your customers, creating a solution, and taking it to market." When I started in product management, I had a lot of questions, like "What is product management?" It's a common question still, but most people don't have a good answer. After all these years, the same questions keep coming up. I see them on forums, I hear them when I talk to new and experienced product managers, and I still do not see them being answered well or usefully. So I wrote this book, with the answers to the questions I always had. You'll learn: The real reason people choose to buy a product - it's not about how "good" the product is! How to get the very best from your developers. The 5-word phrase that can accelerate sales and marketing. The best ways to talk to executives and customers about what you're building. Among other critical information, you'll find a powerful framework for thinking about product management - and even for talking to your Mom about what you do. The framework provides an infrastructure for most of The Secret Product Manager Handbook. I provide a concrete and explicit explanation of why product management is so important for businesses, including a calculation of the true business value of product management. And the book is full of specific techniques and practices for transforming your product management career. What People Are Saying "Nuggets of product management wisdom and ideas you'll want to hang on your monitor. The book is like having a conversation with a mentor." (Ken Hanson, Growth Product Manager) The summary of product management - identify market problems, guide the creation of solutions, and take the solutions to market - is powerful. As a former engineer, it's especially important to be reminded of the third point" (Frank Licea, Product Manager) "The intro is one of the clearest and smartest explanations of the value a product manager should bring to the table I've ever read." (Luca Candela, VP of Product Management)

The Art of Product Management takes us inside the head of a product management thought leader: all about Silicon Valley start-ups, thinking like a customer, and the creation of new technology products

This year's report presents evidence that the absolute number of people who suffer from hunger continues to slowly increase. The report also highlights that food insecurity is more than just hunger. For the first time, the report provides evidence that many people in the world, even if not hungry, experience moderate food insecurity as they face uncertainties about their ability to obtain food and are forced to compromise on the quality and/or quantity of the food they consume. This phenomenon is observed globally, not only in low- and middle-income countries but also in high income countries. The report also shows that the world is not on track to meet global nutrition targets, including those on low birthweight and on reducing stunting among children under five years. Moreover, overweight and obesity continue to increase in all regions, particularly among school-age children and adults. The report stresses that no region is exempt from the epidemic of overweight and obesity, underscoring the necessity of multifaceted, multisectoral approaches to halt and reverse these worrying trends. In light of the fragile state of the world economy, the report presents new evidence confirming that hunger has been on the rise for many countries where the economy has slowed down or contracted. Unpacking the links between economic slowdowns and downturns and food insecurity and malnutrition, the report contends that the effects of the former on the latter can only be offset by addressing the root causes of hunger and malnutrition: poverty, inequality and marginalization.
